

Zain Irfan

Full-Stack Software Engineer

Lahore, Pakistan | 03134540820 | zainirfan565@gmail.com | linkedin.com/in/zain-irfan-programmer | github.com/ProgrammerZain

SUMMARY

Full-Stack Software Engineer with 2+ years building production web and mobile applications with Python, Django, FastAPI, React, and React Native. Deep experience delivering HIPAA-compliant, multi-tenant healthcare SaaS and LLM-powered automation platforms. Skilled in REST API design, real-time systems, and third-party integrations at scale.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Dart

Backend: Django, Django REST Framework, FastAPI, REST APIs, WebSockets, Celery, Redis, JWT, Multi-tenant Architecture

Frontend: React, Next.js, Redux, React Query, Tailwind CSS, MUI, Canvas API

Mobile: React Native, Flutter

Databases: PostgreSQL, MySQL, MongoDB, Pinecone

AI & Automation: OpenAI API, Claude Code, Prompt Engineering, Selenium

Cloud & Integrations: Docker, Amazon S3, DigitalOcean Spaces, RingCentral, Google SSO, APNs, Shopify API

EXPERIENCE

Software Engineer — Adaptive Nodes | Lahore, Pakistan

Aug 2025 – Present

- Built and scaled a HIPAA-compliant, multi-tenant healthcare SaaS platform serving **7+ organizations and 1,000+ users**, delivering **9+ core modules** including clinician management, scheduling, and patient referrals
- Designed and shipped **50+ REST APIs** powering referrals, messaging, authentication, scheduling, and reporting workflows
- Reduced referral load time from **~6s to ~2s** via database query optimization and eliminated **12+ redundant API calls** through React hook refactoring, cutting frontend network overhead
- Built real-time messaging and push notifications using WebSockets, WatermelonDB, and APNs across web and mobile; extended authentication with JWT, role-based access control, and Google SSO
- Engineered Selenium automation pipelines integrating **3 external healthcare systems**, reducing manual referral processing; integrated RingCentral for in-app patient calling with call transcription
- Implemented system-wide audit logging to improve compliance traceability across user and clinician activity

Software Engineer — Evolve Edge Technologies | Lahore, Pakistan

Dec 2024 – Aug 2025

- Built **3 production AI-powered applications** using Django, Next.js, PostgreSQL, OpenAI APIs, and Pinecone, including LLM-powered document processing and semantic search
- Orchestrated end-to-end automation pipelines with Selenium, OpenAI, and Pinecone to collect, process, and categorize government opportunities, backed by asynchronous background processing via Redis and RQ Workers
- Designed conversational AI workflows across WhatsApp and web, and integrated DigitalOcean Spaces, Cloudinary, and Canvas API for cloud storage and dynamic image generation

React Native Intern — Tech Integration | Sheikhupura, Pakistan

Aug 2024 – Nov 2024

- Built responsive React Native interfaces for Shopify store app and integrated Shopify APIs for product listing, cart management, and order processing

EDUCATION

Bachelor of Information Technology — Govt Civil Lines SKP, Sheikhupura, Pakistan | 2020 – 2024
